

The LaserBits NewsLine

the leading resource for laser products & technical support

EngraveLab Photo Laser Plus

PhotoLaser Plus is the newest package in the EngraveLab family of products. The perfect companion product for CorelDraw™. Process digital images in PhotoLaser Plus and ensure the highest quality laser engraving output.

Great laser production tools and benefits:

- Seamless integration between CorelDraw and PhotoLaser Plus via the Corel application launcher.
- Send jobs to your laser engraver directly from PhotoLaser Plus.
- Convert color, grey scale or monochrome photos into ready to cut vector files in one easy step!
- On Screen Job Preview. Simulate final output on different materials.
- Support for both raster engraving and vector cutting. Cut shapes directly from substrates.
- Text condense feature ensures automatic fit to nameplates/ badges.
- Create badges quickly and easily. Variable data support using our unique "Badging feature provides an instant way in which to substitute text or numbers in a single layout.
