

## Why LaserUniversity?

This learning site is available to subscribers 24/7 - new content is added and updated as the Laser Engraving industry shifts and changes.

Of course we feel LaserU is the best value around, but you decide. Compare what we provide from any internet-connected computer. Unlike a seminar, we offer a wide range of skills and product ideas from introductory to experienced depths. You can revisit any portion as many times as you desire AND we are always an email or phone call away. Even online, our product is still extremely personable and people-oriented. LaserU covers a wide range of topics in varying degrees of difficulty and is available whenever you are!

## LaserU features these topics and more!

Your Laser System • Learning Center • Corel Center • Project Center • Settings Calculator

### What you get for the money

#### LaserUniversity

Average cost \$36/month  
Content added & updated  
Learn at YOUR pace  
Available 24/7  
Novice & experienced levels

Continued customer support  
Info is reviewable & printable

vs.

#### Seminar Cost

Average airfare - \$350  
Average one-night hotel - \$200  
Average seminar/show - \$85  
Typical seminar length - 2 hrs  
Limited topics covered  
Limited depth covered  
No ongoing customer support

›Home ► **Your Laser System**

The YLS section provides specific information on individual lasers. It helps new users get up and running and to print their first laser engraved item. Experienced users can benefit with tips and tricks to maximize their investment.

## ›Home ▶ Learning Center

Learning to laser engrave is a step-by-step process. Our courses are set up to take you on a complete journey designed to make you an engraving pro.

Within each course are 4-7 lessons followed by a quiz. You can follow in a sequential order beginning with Course 1 Lesson 1 and proceed on or you may jump around taking in the information you need right away. Either way you will walk away with great information and increased knowledge.

## ›Home ▶ The Corel Center

The Corel Center provides information in both print and video formats for Corel versions 12 - X4. The skill level begins with Introductory and works up to Experienced level. Skills are presented in both CorelDRAW and Corel PHOTO-PAINT.

## ›Home ▶ The Project Center

Our Project Center helps subscribers with product ideas for their business. Again, information is found for both novice and experienced users.

## ›Home ▶ Settings Calculator

The Settings Calculator calculates the speed and power settings for over 10 different lasers. Enter in the manufacturer, wattage and substrate and receive raster & vector settings. The calculator is based on current manufacturer data.

### Power, Speed & Resolution Settings Calculator for Engraving

Select a laser manufacturer, the rated power & the material. In the results below will be suggested power, speed & resolution settings for the engraving job.

To print these results, go to File> Print in your browser.

Epilog 60 acrylic

**CALCULATE**

**Engraving Results:**

<b>Raster</b>	<b>40</b> Power	<b>100</b> Speed	<b>600</b> Resolution
<b>Vector</b>	<b>100</b> Power	<b>6</b> Speed	<b>5000</b> Resolution

**Tech Tip:**  
There are two types of acrylic, cast and extruded. Cast turns white or frosted and extruded remains clear when engraved. Use extruded acrylic for paint filled engraving and cast for regular engraving.

Masking and multiple passes may assist in cutting thicker materials and help from getting a melted edge.
