

TECH TIP

EngraveLab

With EngraveLab - you have one software package that does it all! Take your engraving business to the next level with this tool.

EngraveLab replaces programs like CorelDRAW with its array of graphic tools, text controls and photo engraving software specifically designed for laser engraving. EngraveLab combines the best features from several leading software packages into a single product.

EngraveLab features include:

1. built-in vectorizing tool with scanner interface
2. cad-based program allows for more accurate placement and vectors are controlled with minimal node usage
3. merges from .txt or word files
4. photo enhancement features
5. laser-ready clip art

Check out some major benefits this time saving software package has to offer:

Graphic Tools

With powerful tools to create, edit, scan and cleaning up vector and bitmap based graphics; EngraveLab can handle all the requirements of the signage, trophy and awards or industrial engraving professional.

Text Controls

Whether you are in the graphics / signage, trophy and awards, or industrial engraving markets, EngraveLab has all the tools too efficiently and effectively produce text to meet your customers demands. EngraveLab's text handling capabilities are second to none.

Photo Laser

Photo Laser is an additional tool included with EngraveLab Laser that provides the added power to output any photo to your laser engraver.

Engraving

Add another dimension to text, logos, artwork and marking applications by using EngraveLab's powerful and efficient engraving fills. Get the most out of your rotary and laser engraving equipment with EngraveLab.

Tutorials

Lessons on serialization, tracing monochrome bitmaps and more!
