

LaserUniversity

Overview: Learning Center, Corel Center & Project Center

While LaserU offers so much more, the main content areas are the **Learning Center**, the **Corel Center** and the **Project Center**. These areas are continually updated and fine tuned along with new content to increase the breadth and depth of the offerings.

A preview video can be seen at www.laseru.com - click on Preview LaserU

The Learning Center - each course contains 4 – 9 lessons that are followed by an interactive quiz. The lessons can be followed in sequential order or the user may jump around taking in the information as needed. Either way, the subscriber will walk away with great information and increased knowledge.

The Corel Center – this center allows the learner to gain the skills necessary to maneuver and manipulate the tools of CorelDRAW and Corel PHOTO-PAINT! The tutorials are not only divided between DRAW and PAINT but also by three skill levels from introductory to novice to experienced. There are both text versions and video versions of the lessons available.

The Project Center – ideas in the making! The learning here is focused not on the detailed steps of the Corel Center or the information on substrates like the Learning Center but on how to create specific products and come away with product ideas for business, customers and profit.

Below you will get a look into what these three areas have to offer. *Keep in mind that the subject matter is perpetually changing and expanding.*

The Learning Center

Course titles include:

- Understanding the Laser System
- General Laser Use & Safety
- Acrylic
- Wood
- Stamps
- Coated Metals
- Metal Marking with CerMark
- Marketing & Sales
- Photo Engraving
- Holiday Ornaments in Wood, Glass & Acrylic
- Decorating with Your Laser

Within each course are 4 – 9 lessons that not only teach how to engrave and cut the substrate, but it also provides product ideas and will incorporate skills & functions of CorelDRAW & PHOTO-PAINT.

All examples shown are part of LaserU content and learning.

The Corel Center

Find out how to make the most of your images with LaserU!

All examples shown are part of LaserU content and learning.

The skills and tools in the Corel Center give the subscriber the ability to get up and running with their first laser engraved job and the experienced user the depth needed to fine tune their craft.

The center is set up in a dual purpose manner. Text files are created in a printable format to always have on hand. The video files are an added bonus. They follow the text files along and show exactly *how* to use the Corel programs.

The DRAW section is wide ranging in its appeal. It looks at introductory basics such as setting up the drawing canvas to involved techniques as Vectorizing images, using the Shaping Docker or creating fixtures.

The PHOTO-PAINT section focuses on images! How to adjust, crop, modify, remove red-eye, stitch them together, balance coloring, remove backgrounds, using PHOTO-PAINT with PhotoGrav and much more.

The Project Center

This center is purely for fun and enjoyment! Here the creativity flows and is never ending. Current subscribers are beginning to add their ideas and fabulous creations to the mix.

The ideas here are meant to spark the imagination of what the user can take back to their own shop and turn into profit.
